

COM668 Computing Project

Module Overview

Module Overview

- Module organisation
- Assessment and feedback
- First Steps
- But first...

COM668 Project

Starting at the end

End goal

- Report your concept, challenge, process, outcomes and evaluation
 - Two main reports during the year
 - Structure and length of reports are constrained and must be followed
 - Examples will be available Blackboard (*note these differ from this year*)
- Produce a product that embodies a significant technical challenge
 - e.g. Website: *interactive interface, server-side database and scripting*
 - e.g. Application: *interact with sensor , processing data, outputting result*
- Demonstrate your product and your understanding of the underlying code
 - Video demonstration of your project during semester 2
 - Structure and length of video is constrained and must be followed
- Evidence sustained professional practice during the year
 - Through your approach and engagement

Module Handbook has full details

COM668 Project

Organisation

Organisation

- Module
- Lectures
- Mentors
- Peer Support Groups

Module

- Module Code is COM668
- Module Coordinator is George Moore
- 40 credit point module
- Assessed across 2 semesters
- Full details are in the Module Handbook (available on Blackboard)

Guidance Lectures

- Published online by the Module Coordinator
 - Available immediately, to allow you to self-pace
 - Communicate essential module information
 - Consider module requirements and guidelines
 - Direct you how to best develop important skills
 - Address module/process level questions
 - Provoke further research and learning
-
- Additional on-campus lectures at key points each semester

Mentors

- Each of you has been allocated a Mentor
- Mentors will become familiar with you and your project
- Mentors provide guidance
 - How information from the lectures applies to your project
 - How to address challenges you encounter along the way, etc.
- Mentors provide feedback
 - Continuous formative feedback regarding your progress
 - Summative feedback regarding the quality of your completed work
- You are required to meet your Mentor in scheduled group meetings
- Mentors also act as your Studies Advisers

Peer Support Groups

- You have been placed in a Peer Support Group (PSG)
 - PSG members are encouraged to support each other
 - There are no group deliverables
 - There is no peer assessment
- All students in a PSG have the same Mentor

Mentoring schedule

- Meet you Mentor as a Peer Support Group
 - On even numbered weeks, both semesters
 - Sessions will be scheduled in advance by your Mentor
 - Attendance is recorded
 - Meetings may be held using Teams or on-campus
 - Mentors may at times make alternative arrangements, if needed
 - Your engagement will help to inform our assessment
- Additional one-to-one Mentor meetings can be requested as needed

COM668 Project

Assessment and Feedback

Assessment and feedback

- One staged coursework comprising four Assessment Tasks (ATs)
 - **All ATs must be submitted to successfully complete the module**
 - Rubrics for each AT are available in the Module Handbook
- Your practice and your output are assessed
 - We are looking for a good professional approach
 - We are assessing process and ability to deliver, not just what is delivered
- Assessment is by panel (Mentor and Marker)
- Feedback will be available within 20 working days of submission

Assessment Schedule

Assessment Task	Deadline	Submitted to	Responsible	Weight
AT1 Agreed Proposal Form	12 February by noon	Blackboard	Student	Formative
AT1 Ethics Application	26 February	Online Ethics Database	Mentor	Formative
AT1 BCS Guidelines Check	26 February	Blackboard	Mentor	Formative
AT2 Challenge Definition Report	23 April by noon	Blackboard and Turnitin	Student	45%
AT3 Software Demo Video	9 July by noon	Panopto via Blackboard	Student	25%
AT4 Project Review Report	13 August by noon	Blackboard and Turnitin	Student	30%

All Assessment Tasks must be submitted to successfully complete the module

Workload

- There is a lot to do
- At times the schedule is busy
- This accumulates to a major piece of work (40 credit points)
- If it were easy, then it would not have value

COM668 Project

First steps

First few weeks in a nutshell

- Week 1 and 2: Discuss & agree a concept proposal with your Mentor
- Week 3: Submit agreed proposal to Blackboard, using form provided
- Week 4: Mentor completes ethics and BCS review on your behalf
- Week 1 - onwards:
 - Read the Module Handbook
 - Watch the lecture videos
 - Attend PSG meetings with your Mentor
 - Ask questions if you have any
 - Start working towards the assessment
 - Start early stage development work

COM668 Computing Project

Next, meet your Mentor
